BEST PRACTICES

for living in the

Wildland Urban Interface

August 12 & 13, 2013

Ruidoso, New Mexico » Inn of the Mountain Gods

Do you live in a Wildland Urban Interface (WUI) community? Wildfire Safe, Sound and Codesmart is a multifaceted approach to WUI fire mitigation. This national program guides and supports community leaders as they develop and adopt a WUI code, while actively encouraging implementation of existing WUI educational programs in effected communities throughout the United States.

Public education and awareness programs like Firesafe, Firemart, Firewise, Firefree, Fireready and Ready, Set, Go play a vital role in reducing the risk of WUI fires by educating communities. Wildfire Safe, Sound and Codesmart programs incorporate these elements to proactively protect life and property before disaster strikes.

Open to Everyone!

Become a part of the solution!

Conference Fee: \$50

Visit www.WUIConference.com to register
